

UNIPAK® Cable Spray with 30% Silicone

Unipak Cable Spray is suitable as a lubricant for wire pulling and for moisture insulation of electrical installations. Provides immediate high friction reduction, but remains lubricating over time thanks to a unique combination of silicone oils. The Cable Spray is easy to use - simply apply a current "adequate" amount of spray with cables under the feed-in into conduit pipes or cable channels. Harmless to the ozone layer.

400 ml spray can (12 pcs./krt.) Item no.: 1900040

GALVEX cold galvanization

GALVEX cold galvanization is a galvanic-action, corrosion-proof special paint, used for cold galvanization of iron structures, pipes and fittings, containers, etc., and for repairs of damage to hot-galvanized items. GALVEX provides effective protection against rust, and prevents rust spreading from unprotected areas. Also protects against fungal attack in paintwork.

200 ml spray can (12 pcs./krt.) Item no.: 2500020

500 ml spray can (12 pcs./krt.) Item no.: 2500000

UNIPAK® Raw Linseed Oil Spray

Unipak Raw linseed oil spray is used to impregnate hemp and for lubrication of brass, copper and steel unions. Prevents squicks and knocks. Ensures tight and sturdy joints.

200 ml spray can (12 pcs./krt.) Item no.: 3500020

UNIPAK® Sprays

- for professionals!

www.dorthebo.dk

Unipak®

- quality guaranteed...

UNIPAK professional sprays consist of a series of different sprays all of which are specially adapted to demanding maintenance- and cleaning tasks.

MULTITEC leak detector

MULTITEC leak detector spray is used to track down leaks in systems carrying all types of air and gases. MULTITEC is sprayed on pipe joints or other places where there are suspected leaks or where there is a risk that leaks might occur; any leaks will immediately cause the applied liquid to bubble up. Always ensure that leak detector liquid is applied all round the pipe joint.

The test spot must be rinsed thoroughly with water after test. Exists in a special version with freezing point <-30°C.

400 ml spray can (12 pcs./krt.) Item no.: 2700040
225 ml spray can (12 pcs./krt.) Item no.: 2700020
400 ml spray can -30°C (12 pcs./krt.) Item no.: 2700041

GLIDEX 20% Silicone Spray

GLIDEX silicone spray is extremely suitable as a lubricant for the assembly of socket pipes, rubber strips and joints, when pulling cables in tubes and for the moisture insulation of electrical installations. Prevents ageing of rubber parts. Furthermore, GLIDEX spray is an efficient, quick-acting slide coating for sluggish locks, hinges, fittings, tools etc. NSF approved silicone oil for use in food industry.

400 ml spray can (12 pcs./krt.) Item no.: 2000000

S.A.N. 30% Silicone Spray

S.A.N.® Silicone Spray is made of 100% pure, high-grade silicone-oil. S.A.N.® silicone Spray has a full 30% concentration of silicone-oil, which makes it very efficient and economical in use. It is fitted with an "up-side-down" valve enabling it to be used in any angle. NSF approved silicone oil for use in food industry.

500 ml spray can (12 pcs./krt.) Item no.: 2000003

UNIPAK® Degreaser

UNIPAK Degreaser is a high performance industrial degreaser that dissolves grease, oil, dirt, soot, ink, and most non-curing adhesives and glue residue - typically those found on the adhesive side of labels. UNIPAK Degreaser contains no corrosives, making it suitable for use on both glass, metal, laminates, brick and many painted surfaces. However, we recommend strongly testing the surface tolerance for UNIPAK Degreaser on an inconspicuous area before using the product in full scale. Especially certain plastics and lacquers can be affected by UNIPAK Degreaser.

After cleaning with UNIPAK Degreaser the cleaned area should always be rinsed thoroughly with water!

400 ml spray can (12 pcs./krt.) Item no.: 2800100

UNIPAK® Multi-oil with PTFE Universal oil-based lubricating spray - acid free!

UNIPAK Multi-oil is an all-round multi-purpose lubricant, suitable for all lubrication tasks on moving parts. UNIPAK Multi-oil's excellent penetrating properties and content of PTFE makes the oil equally suitable for lubricating in the finest precision engineering as well as more heavy duty equipment and provides outstanding lubricating properties even at high loads and high temperatures.

400 ml spray can (12 pcs./krt.) Item no.: 2800120

UNIPAK® Penetrant Universal rust-dissolver with PTFE

UNIPAK Penetrant is a super-penetrating rust-dissolver and corrosion protection.

UNIPAK Penetrant is also added PTFE to further help reduce friction and support the separation of "seized" subjects. UNIPAK Penetrant is made from the finest acid-free mineral oils and is suitable both as "rust-dissolver" and as a lubricant.

400 ml spray can (12 pcs./krt.) Item no.: 2800110
