PRE INFO NEW PRODUCT
ROSCOPE mini

ROTHENBERGER

Short description of product:

The ROSCOPE mini is a compact inspection camera which fits perfectly into the new ROBOX system. Its small size makes it a „tool for every tool box". The Ø8,5mm IP68 waterproofed imager snake has a length of 120cm which makes it the perfect tool for a quick and easy solution. The ROSCOPE Mini is powered by 4 standard AA cells and is able to save 30 picture images on its on-board storage. Additionally there are magnet and mirror imager accessories stored in an internal cavity within the unit. On top there is a belt-clip feature on the rear cover. Every end user should have one unit for all small inspections during his daily business – e.g. hollow space inspection, ACR control, etc.

Key buying factors

The extremely compact design makes it a „tool for every toolbox"

Ø8,5mm waterproof camera imager to 1m water depth

180° rotatable 2,5" display with digital 4x zoom

features	benefits
Extremely compact design with Cable inlets for the perfect stowage	The end user is always able to stow it cleanly in every tool box.
Ø8,5mm / 120cm flexible imager snake with tool-free mirror and magnet accessory	Flexible, fast and easy usage. 90° pipe bends are no challenge. There is no disassembly needed and small objects can be grabbed easily thanks to the magnet accessory.
Belt clip	Using the belt clip, the customer is always having the camera within reach, and is able to make a quick inspection whenever it is necessary.
