

PRODUCT DESCRIPTION:

UNIPAK White is a light grey, non-hardening, high-viscosity/paste jointing compound based on saponified vegetable fatty acids, naturally occurring minerals, viscosity regulating oils and water.

UNIPAK White jointing compound is applied together with flax/hemp.

TECHNICAL PROPERTIES:

- Sealing of threaded pipe joints on potable water systems, cold and hot water systems and low pressure steam systems (max. 130°C and 8 bar).
- 100% tight threaded pipe joints.
- No stains.
- Easy and simple connection/assembly.
- Easy disconnection/disassembly.
- Pipe joints remain tight when loosened contrary to e.g. thread seal tape resulting in great adjusting flexibility.
- Max. temperature: 130°C.
- Max. pressure: 8 bar.

APPROVAL:

 UNIPAK White jointing compound is approved for drinking water applications by The Danish Transport, Construction and Housing Authority (Trafik-, Bygge- og Boligstyrelsen):

Godkendelse nr: 06/00003

DIRECTIONS:

- Apply flax/hemp evenly and tightly to the thread in the direction of inclination of the thread.
- Apply an adequate quantity of UNIPAK WHITE jointing compound in an even layer.
- Connect straight away and installation can be put into service.
- Remove any surplus jointing compound with a cloth or the like.
